(54) Title: METHOD AND DEVICE FOR GALVANIZING OBJECTS

(57) **Abstract:** The present invention relates to a method for thermally galvanizing objects, in particular metal objects, comprising the steps of: pretreating an object for treating, including removing the surface layer from the object; arranging the pretreated object in a flux bath for fluxing of the object; arranging the fluxed object in a zinc bath in order to have the material of the object react with zinc and to apply a zinc-containing layer to the object, wherein the step of pretreating comprises of blasting the object with grains so as to remove at least the surface layer. The invention also relates to a device for shot-blasting objects, in particular as pretreatment in the galvanizing of the object.
